

Mobile Panic Alert

Part No. NXFOB

ALERTEX
WIRELESS CRITICAL ALERT SYSTEM

Product Overview

The NXFOB is a dual button fob that can be used in conjunction with the ALERTEX Wireless Alert system.

The keyfob acts as a portable call point and activates the ALERTEX system when both buttons are pressed and held for 4 seconds; this helps to avoid false activation. Users must be within 100 metres of standard ALERTEX alerts. The LED light on the fob shows the status of the device when transmitting.

A lanyard with a breakaway clip is supplied with the unit so that it may be worn around the neck and accessed easily in case of a lockdown situation. The keyfob counts as one of up to 64 ALERTEX units that can be used per site.

Technical Specifications

Dual button keyfob

Anti-false press button sequence

Up to 100m transmission range

2 year battery life (dependent on usage)

License exempt

Battery: 12V alkaline - 23A type

Frequency: 433.42Mhz

Temperature range: -10°C to +40°C

Dimensions (mm): L75 x W45 x D19

Typical Example:
